

Prebona OdorControl™

User Guide

Area of Use

Prebona OdorControl will eliminate odors from e.g. smoke, urine, mold, mildew within minutes.

Usage areas include:

Spray bottle application: Smaller items such as bags, shoes, lockers.

Cold fogger application: Hotel rooms, kitchens, bathrooms, garbage areas, etc.

Application

Before application, make sure to remove the source of the odor and clean the area. Apply it to the floor, ceiling, textiles, bed, curtains, and focus on the area where the source used to be. In hotel rooms, apply OdorControl before making the bed, as the application might leave a minor film on some surfaces. If this is the case, simply wait 15 minutes and then wipe the area with a wet cloth. Use protective clothing, respiratory protection, goggles and protective gloves when applying Prebona OdorControl (primarily when using a cold fogger).

Safety

If exposed to eyes, rinse with water for several minutes. If exposed to skin, rinse with water. If irritation occurs, contact physician.

Dosage

Cover the area gently. By using a cold fogger, the droplets are minimized and more spread out.

Content

5% SiO₂ in water. Surfactant.

Storage and Shelf-Life

Store in all-plastic container (elements of high-graded stainless steel is acceptable) at 41°F – 95°F. Should be used within 6 months from production date.

Waste Disposal

Container is disposed as plastic. Spillage and left-over should be handled to avoid exposure to environment.

Packaging

Prebona OdorControl is available in the following packaging:

- 32 oz. plastic spray bottle
- 5-gallon plastic container
- 1000 liter black IBC
